---

### **2023-08-19 meanwhile elsewhere**

I had meant to write something today, but I'm just getting over a case of the COVID and had a hard time getting to it. Instead I did the yard work, edited and uploaded a YouTube video, and then spewed out a Cohost thread as long as a blog post. So in lieu of your regularly scheduled content, I'd like to link you to the Cohost thread on the Monticello AT&T microwave site (complete with pictures!) and the YouTube version of the same (complete with many more pictures, in that it's a video, but not as well written!).

I'll return next time with, probably, something about smart cards.
